

ABOUT MRC 2025

Celebrate the momentum of marine renewable energy at the Marine Renewables Canada 2025 Conference & Exhibition (MRC 2025), **bringing together leaders from across Canada and around the world to explore progress and opportunities in offshore wind, tidal, wave, and river current energy.**

Held in Halifax, Nova Scotia, this three-day event includes:

- Highlights on Canadian industry achievements, progress, and milestones
- Insight into market opportunities in Canada and globally
- Dedicated sessions on Indigenous participation and leadership in the sector
- Updates on policy and regulatory frameworks supporting sector growth
- A technical track focused on research in offshore wind, tidal, wave, and river current energy
- Member-only workshops designed to support business development and growth
- An expanded exhibition
- Multiple Networking opportunities

THE PAVILION

To recognize and support Indigenous leadership, innovation, and entrepreneurship that is vital to a sustainable energy future, MRC is introducing an **Indigenous Business Pavilion**—an inclusive space within the exhibition where Indigenous-owned businesses can connect with industry leaders, showcase their expertise, and explore opportunities in Canada's growing marine renewable energy sector.

The Pavilion offers visibility and access at no cost for up to 7 Indigenous businesses and/or organizations, ensuring that businesses can participate meaningfully in the conference exhibition experience.

Participation includes:

- A shared exhibition booth within the Indigenous Business Pavilion
- Space to display materials, project info, or business offerings
- 50% discounted full conference pass [AW2] (i.e. access to conference speaker sessions)
- Access to key conference events, networking receptions, and B2B meeting opportunities
- Company logo & profile listed on conference website & app

Whether your work is directly in energy or in a related field—like environmental services, construction, technology, or consulting—we invite you to take part!

LEARN MORE TODAY

With continued growth in Canada's marine renewable energy sector, **MRC 2025 will be bigger than ever. Don't miss your chance to be part of it!**
